

# EUROGATE ENERGY POLICY

Energy resources are precious. The EUROGATE Group pursues a respectful and conscious use of energy sources. Therefore the below companies have committed to enhancing their energy efficiency on a continuous basis.

## TO THAT END, WE REGULARLY REVIEW OUR BASIC POLICIES:

- We regularly keep record and conduct a detailed evaluation of our energy consumption and CO<sub>2</sub> emissions. This analysis forms the basis of our binding targets.
- We assign employees specifically responsible for the development and implementation of measures that reduce energy consumption and provide them with all the information and resources they need.
- We involve our staff in this process and inform the public about our targets and measures.
- We comply with all applicable energy regulations.
- We take energy efficiency into account in our procurement process.
