

Data Privacy Policy for our Customers and Business Partners

How do we treat your data and what rights do you have?

Information on the collection of personal data pursuant to Articles 13, 14 and 21 of the General Data Protection Regulation (GDPR)

On 25 May 2018, the General Data Protection Regulation (GDPR) will come into force, substantially strengthening the data protection of data subjects in the European Union. We have always paid great attention to the security of your personal data.

The GDPR is the most significant data protection legislation in Europe since the EU Date Protection Directive from 1995. Following a two-year transition phase, the GDPR will now replace the outdated EU Data Protection Directive and, to a large extent, also the national data protection legislation of the individual countries. In contrast to a Directive, a Regulation is directly applicable in all the EU Member States without requiring national implementation legislation. This is therefore the first uniform data protection legislation that will apply across all the EU Member States. It lifts the data protection level in the EU Member States and, at the same time, strengthens the rights of data subjects in the same degree as it increases the obligations of enterprises.
